Boilermaker Editor Tours Campus

By Jim Hoffman

On February 5 and 6 the Boilermaker sent me on an all-expense paid trip to the campus. Dr. Scott of the Technical Extension Division made appointments with the various personnel and secured my hotel room in advance, thereby eliminating the difficulty I might have had making ararngements.

Early Tuesday morning I left Hammond and drove Routes 41 and 52 to LaFayette. I arrived at the campus about 10 a.m. and immediately sought Dr. Scott whose office is in the Engineering Administration Building, the building with the tall smokestack. After I had a few words with Dr. Scott, he introduced me to Dean Beese, Head of Technical Extension Division, and we discussed the present Extension program and the fee situation. Dr. Scott and I then went to the Union Building and I checked into my room. Then a short tour of the building ensucd.

The Union Building is a small city in itself. The basement houses 15 modern bowling alleys; 10 darkrooms for Camera Club Members; the Student Workshop, where dance scenery, etc., is constructed; and the Railroad Club complete with all accessories.

The first floor contains the cafeteria where the food is priced very reasonably; the sweet shop that is similar to an ice cream parlor; the billiard room where both boys and girls may play; a game room for cards, chess, and checker playIn, T.V. viewing, too; and also a barbershop.

The second floor holds the two ballrooms which can be combined for big dances, several student lounges, a browsing room, and war memorials. The memorial to former students of Purdue University who were killed in the ravages of W.W. I is a large plaque with their names on it and beside it stand two American flags. On the floor, inlaid in the tile, is a cross; no one is permitted to walk here.

On the third floor are the music room, for enjoyment of classical and semi-classical music; the terrace and the entrance to the tower cabaret where some parties and dances are held; the Chestnut Dining Room and the student activity offices. The Union Club, namely the hotel, is on all floors.

After the tour of the building, Dr. Scott and I lunched in the cafeteria; then he introduced me to Joe Rudloph, secretary of hte Alumni Association, who was to continue my tour of the campus. We first viewed the future addition to the library which will be connected to the Union Building by an underground tunnel. Later I toured the fieldhouse; the living quarters for both male and female students, single and married; the gymnasium; the hall of music, a very unique building and also very huge; the radio station; the airport; and the Aeronautical Engineering Building. A new building is being constructed on the west side of the campus next to Hall "X." This building will be a recreational gymnasium for mixed groups and intramural activities. It will have both indoor and outdoor swimming pools.

After leaving the tour, Joe had to go home, since it was about 5 p.m.; so I went to the cafeteria, ate supper, and then roamed around the campus until 7 p.m. I later met a former PUCC student, Delcy Magioudis, and we bowled a few lines in the Union Building. All women students must be in their quarters by 10:30 p.m., so we left for WRH-E where she stays. I then went back to the Union Building, shot a few pictures, and retired.

At 10:00 a.m. Wednesday, I went to the Engineering Administration Building and talked to Professor Spalding who recently spoke here. I then met Dr. Scott and we visited the T. V. Studio where a closed channel program was in progress. Since Dr. Scott had other business to attend, I roamed around the campus some more, visiting Hall "X" and the airport and Aeronautical Engineering School. Then I returned to the Union, packed my belongings and was off for Hammond and good old PUCC.

Before I left for the campus, someone here at the center said that each building on the campus was artistic, but the combinations of many types of architecture were hideous. When I arrived at the campus, I questionned why this is true and was told that Purdue is not an Ivy League College and uses the most efficient type or architecture that is available. That is why, as each building is constricted, it is different from the previous buildings.

I wish to thank all the Associates of Purdue University who made my trip possible and also very successful, especially Dr. Scott and Joe Rudolph who made my visit a most enjoyable one.

Mr. Tackett assigning duties to Mr. Combs.

Newspaper Awards

At the last meeting of the Boilermaker Staff it was decided that awards would be given for service. The awards are as follows: (1) Certificate of Recognition for all students participating satisfactorily in Boilermaker activities. (2) Outstanding Accomplishment Pin for students who devote extra time and effort to forward the goals of the Boilermaker. (3) A plaque will be placed in the hall and each year the name of the student who distinguishes himself above all others will be added to this plaque as a token of appreciation.

The advisors of the Boilermaker staff are responsible for deciding who will be the recipients of these awards. Students who join the Boilermaker staff now are eligible to receive awards at the May awards assembly.

Parking Difficulties?

"Holy Cow!" Where am I going to park my car? This familiar phrase and others such as this run through the minds of PU students driving to school. Lately one has to get to school by 7:45 or walk a block.

Have you ever tried parking in front of school in the spring? It can be done if you can afford the towing charges to get out of axle-deep mud. If the lot in front of the building could be graveled and a driveway constructed through the middle of the lot, cars could be parked two deep, thus eliminating much of the congestion.

Sunday Evening Group Organized at Woodmar Methodist Church

The Sunday Evening Group, recently organized at the Woodmar Methodist Church, will meet the second and fourth Sunday night of each month at 8:30, at the Woodmar Community Center, 173rd and Northcote.

The group was formed specifically for unmarried college-age men and women and offers a program of religious and ethical discussions around the big fireplace, fellowship, social activities, philanthropic projects, sports, outside activities. The Reverend Richard Thistle and the Reverend Herbert Wingard are discussion leaders and Mrs. Walter Baxter is church sponsor.

All Purdue University Calumet Center students who are interested in such a group are cordially invited to attend.

Boilermaker Makes Staff Change

Because of semester change, the Boilermaker has lost a few staff members and gained a few. Losses to the staff were Sharon Haley, who did a fine job on "Penny for Your Tohughts," "Letter to the Campus," and personalities; and Ken Ashley, with his "Beef 'n' Corn" and sports. Staff additions are Cathy Delinck, Terry Ingram, Marlene Kilcullen, Margot Miles, Satch Okray, Golden Richmond, Carol Sarina, and Sue Smith. Satch is writing "Beef 'n' Corn." Alden Jenkins is our new sports editor and LaVerne Landwehr is writing editorials.

PUCC Whips Elgin

PUCC found revenge last Wednesday, Feb. 6, as Clyde Rector and Bob Stryzinski shot up the town in downing Elgin J.C., 69-52.

Both boys paced the Boilermakers with 18 counters, but lost game honors to Elgin's Hopp, who connected for 21 points.

This triumph gave PUCC a 4 and 7 season mark with signs of improving the mark with the remainder of the games to be played.

The victory was made without the services of veteran Chuck Jonas, who was Co-Captain and take-charge man in crucial games. He handed in his uniform right after the LaFayette tournament.

Jerry Jonas, Chuck's brother, took over the starting berth.

(Continued on Page Three)

Mr. Combs Appointed To New Position

Mr. Richard J. Combs, former instructor of mathematics and physics in the Technical Institute, has been appointed as assistant in administration here at PUCC. In his new position Mr. Combs is in charge of public relations in industry and will handle registrations in the Technical Institute.

Mr. Combs is originally from South Dakota, having received his Bachelor of Science and Master's degrees from the University of South Dakota. This was Mr. Combs' second year as full-time instructor here. He taught junior high school mathematics one year in Munster while part-time instructor here; he also taught in Winner, South Dakota.

Mr. Comb's office is in room 32.

Boilermaker Holds Staff Meeting

On Friday, Feb. 8, the Boilermaker's staff and sponsors held a meeting to discuss the possibility of giving out awards. It was decided that they would pass out said awards on a basis of effort put out and length of service.

The reporing staff of the Boilermaker is headed by Jim Hoffman. Jim is in charge of passing out assignemnts, seeing that they are turned in on time, and making the finishing touches on all stories.

Job Opportunities

According to Mr. Combs, a schedule is being worked out for those companies who wish to interview our graduates and other students this spring. These interviews will be assigned dates and these dates will be posted on the Center's bulletin boards, of which there are three: in the student lounge, in the main lobby, and in the hallway entrance to the Inland Steel annex. Additional information and literature on any of the posted jobs may be obtained from Mr. Combs in his office, room 32.

Said Mr. Combs, "Plans are now being made for the expansion of the placement service whereby a greater number of students who are seeking either part-time or full-time employment may come in and make application. Every effort is being made to improve our assistance to both the students and industry."

Summer School

Registration for students interested in enrolling in summer school will take place on June 7th and 8th. Pre-registration will be held early in May. Classes begin on June 10th. The summer semester will terminate on August 3.

Mr. Gyte, director of Purdue Calumet Center, stated that a schedule is in preparation for the summer session and will be available in a week or ten days. Mr. Gyte further stated that PUCC is expecting a record enrollment for the coming semester.

The summer classes will be beneficial to those high school seniors who are graduating with deficiencies in Mathemaics and Chemistry. They will have an opportunity to enroll and remove any deficiencies during summer school. This will make it possible for the student to register as a regular in September. Orientation examinations will also be held prior to this date so that high school seniors may determine whether or not they will be obliged to take Mathematics or Chemistry during summer school.

Dr. Cone Visits the Gold Coast

Dr. L. Winston Cone, Assistant Professor of History and Government on sabbatical leave from Purdue Calumet Center, has reached Accra, the capital of the Gold Coast on the West Coast of Africa.

Dr. Cone left here on February 11 and flew to London, where he stayed a week before flying on down to the Gold Coast on Feb. 19. He will be there March 6, when the Gold Coast becomes the first independent all-African nation in the British Commonwealth.

Ghana, as the new all-Negro West African nation will be known, will have a cabinet and parliamentary system of government under a constitution announced February 8 in London. Ghana's independence was proclaimed by Britain last Sept. 18.

DR. CONE

The trip is part of Dr. Cone's sabbatical leave, which he is spending doing research on political parties and political leaders, particularly in the new democratic governments of the Gold Coast and Nigeria. He hopes eventually to write a book on his observations of local government in Africa. Most of the nations of the world will be represented at the celebrations marking the Gold Coast's independence. Vice President Nixon will represent President Eisenhower.

Prof. Cone has been doing research on Africa at Northwestern University. He has attended seminars at the University, where African economic and governmental officials discussed the continent's political, economic and social development. He has also visited and talked with authorities in this field at Roosevelt College, Boston University, and University of Chicago.

He is no stranger to the Gold Coast. He was stationed in West Africa for two years during World War II. He later saw service with the 19th Weather Squadron, Army Air Force in Egypt, Israel and Iraq.

Dr. Cone spent nearly two months getting ready for the trip. Getting plane reservations, a passport and visa, cabling for hotel reservations, getting innoculated against yellow fever, small pox, tetanus, typhoid and typhus was not easy. He carried drugs to combat malaria, dysentery, yaws and sunburn. It is summer in Accra, and that meant buying summer clothes here in the middle of winter.

Dr. Cone came to the Calumet Center in 1948. Before then he taught at University of Illinois, Navy Pier. He received his doctorate from the University of Chicago.

Around the World

By Geza Cseri

GREECE

Today let me take you to Greece. We shall go by boat from New York, through Gibraltar, and finally to Greece.

As we sail on the Mediterranean Sea and come to the Ionian Sea, we catch sight of the Peloponnesos, the southern portion of continnetal Greece. In a short time we will be able to land at Kalamai and begin the tour of the country. Greece is not very large, and therefore we will be able to see much of her. Our visit will take us to the Ionian Islands, the mainland, the Aegean, the Cyclades, the Dodecanese, Islando, and to Crete. As we wander through the country, we might admire the hilly regions—cut off by short rivers — the country-side where wine, olives, tobacco, raisins, currants, and figs are produced. We will surely admire the beautiful girls. If you are a good mountaineer, you will have a chance to climb Mt. Olympus 9,550 ft.); and if you know how to swim, you will have ample opportunity to go to the magnificent beaches. It is said that the water has different colors at different seasons and also at different parts of the day.

While traveling, we will see not only the countryside but also both the old and new cities: Athens (capitol — 500,000), Thessalonike (225,000), Piraeus (chief port—185,000), Patrai (80,000), Kavalla (50,000), and Larissa (42,000). In these cities new, modern industries are developing rapidly. While staying in these cities, we will be reminded of the majestic history of the past. At Acropolis, outside Athens, stands the ruins of a magnificent civilization. The Parthenon and the Temple of Jupiter show the glorious days of the city-states of 2500 years ago.

After the Persian Wars (500-449 B.C.), the City-states felt a surge of cultural development scarcely equalled in world history. With Pericles, the summit was reached. From this culture the idea of democracy was born. In 338 B.C., Greece was conquered by Philip II of Macedon and his son, Alexander the great, who were able to carry the Greek civilization to the known world. From 146 B.C. 'till year 395 B.C. Greece was ruled by the Romans.

In the Byzanitne Empire (395-1453) Greece was unimportant. When the empire fell, Greece came under the rule of th eTurks. Only in the 19th century does Greece play a part in history again. In 1827 the country became independent and Capo D'Istia was elected president. Shortly after, Otto I of Bavaria subjected the country, but he was disposed of in 1862. A war with Turkey was unsuccessful, but later, international pressure got the island for Greece (1913). After W.W.I. the Greeks were given most of European Turkey and the Bulgarian coast. In W.W. II Greece was neutral until invaded by the Italians from Albania (1940). After the war the country was divided into two groups: Communists and anti-Communists. In 1948, the anti-Communists, with the help of the U.S., won over the Communists. Now Greece has a peaceful life and is a member of N.A.T.O.

Letter to The Campus

Dear Judy,

We have begun a new semester at PUCC, and we certainly have a lot of new faces around. We of course, are initlating these innocents in the proper do's and improper don'ts of life around our majestic halls!

The actions of some of the aged around here, however, may influence these unsuspecting students in the wrong way. Jeanie Clark, better known as the instigator, was observed dissecting an orange. She didn't go berserk just preparing for anatomy. Andrea was helpful though—referred Jeanie to her psychiatrist.

Ingenuity has been blooming lately! Sounds impossible, but it is actually true. A few enterprising females have designed an effective mantrap! Their expense in employing this contraption was small. All they had to do was switch the position of two standard signs and they caught two unsuspecting males. Nice work if you can get it, and they certainly did try.

Bonnie's car has been giving her trouble again. The other day she just couldn't get "the thing" started. The victim of this injustice was her father. After due pleading Bonnie got Dad's car. Do you know a good mechanic? Preferably a good looking one.

I've heard a rumor that a mixer dance is coming up; nothing has materialized yet though.

Char has been studying like mad these days. I guess she'll join you on campus next semester.

Marjy Meek and Shirley Ralph celebrated their anniversaries the same day; both gals have been doing steady for a month now.

Lee Ann Miller has found her guy. She received a diamond last week.

We have been trying desperately to get another chair for the Casino, but all the luck we've had so far has been a poor facsimile for a chair-item, one wastebasket.

A certain steady was amazed the other day while waiting for his better half to make an exit from the casino. He observed a chaos of female confusion! "You just can't fit another girl in the place," he dumbfoundly proclaimed. If there is a will, there must be a way.

Jo Levoy, bless her little calculating heart, has finally figured all those unknowns in Chem.

Must be off now, will write more next time.

Love,
Dorie

MARLENE KILCULLEN

Marlene Kilcullen, a new addition here at the center, moved to Munster eight years ago. She is 17 years old and was born in Indianapolis. She attended Munster High School as a freshman, and during her first year at Munster she was on the newspaper and participated in a play.

At Hammond High she was in Choir, Dramatics, Student Activities, and Latin Club. She majored in college prep.

When she is not in school, Marlene takes piano and dance lessons; she also works part-time at Nagdemans. She likes almost any sport and says she will try any sport once.

Marlene's course of study is English and psychology. She plans to go down to the Purdue campus next year.

Her pet peeve is that she didn't know P.E.M. 112 was a boys' gym class, and that she is the only girl in most of her classes.

Vital statistics:
Hair—Brown
Eyes—Hazel
Height—5'6½"
Weight—115
Age—17 yr.
Phone number .....?
Address .....?
(Sorry boys.)

Beef 'n' Corn

Archie MacDonald: "There are an awful lot of girls who don't want to get married."

Marjy Meek: "How do you know?"

Archie: "I've asked them."

* * *

A well known zoology professor was unwrapping a parcel which, he explained to his pupils, was a fine specimen of a disected frog. Upon disclosing two sandwiches, a hard-boiled egg, and a banana, he exclaimed, "But surely I ate my lunch!"

* * *

Cathie Delinck: "The man I marry must be as brave as a lion, but but not conceited; wise as Solomon, but meek as a lamb—a man not forward; handsome as Apollo, who is kind to every woman, but loves only me."

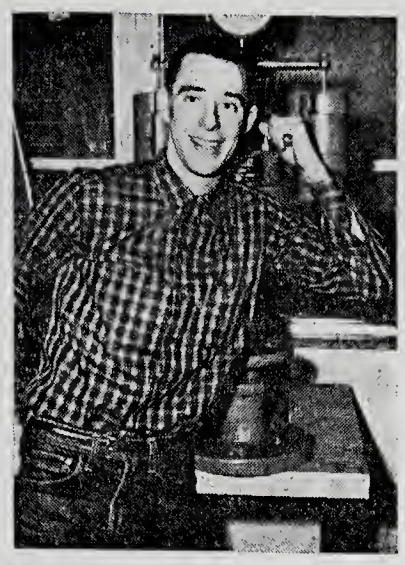
Satch: "How lucky we met."

* * *

MEN ONLY!!!!

How to give a girl a surprise: Place your arms around her waist. Draw her strongly toward you and hold her tight. Start to kiss her. When she says "Stop," release her. (Note the amazement on her face.)

A few days ago Dr. Ken Wilson had on hand (not literally, but in a bottle) two cockroaches. They weren't the ordinary American kitchen kind. In fact, they were tropical specimens, big and fierce enough to worry any DDT bomb.



BOB McILROY

Stepping into our spotlight is Bob McIlroy, a resident of Hammond, Indiana. He is a graduate of Hammond High School, where as a student he was secretary of the Automobile Club, a member of the German Club, and a representative of the Student Council. Bob was also a member of the track team and an accomplished pole vaulter.

As that 'congenial young man about the lounge," you may often find him there pursuing a favorite pastime: telling jokes. Bob, who incidentally has played clarinet for five years, also plays the ukelele. He enjoys dancing and loves to listen to Dixieland music.

As he is working his way through college, Bob is employed during the summertime at Socony Refinery. While majoring in Mechanical Engineering, his aim in life is to own a plant which manufactures airplane parts.

T.I. CORNER

It won't be long now till spring—and spring fever. The Technical Institute students who are planning to graduate this spring have more on hteir minds than spring though, for June means "out into the cold, cruel, world" to earn a living.

Employment for the students is being handled by Mr. Combs. Below is a schedule of job opportunities and interview dates.

Feb. 20—Amercian Air Filter Co.
Feb. 26—Babcock & Wilcox Co.
April 10—Ladish Co.
April 11—Allison Division—General Motors.
May 3—Sperry Gyroscope.

Watch later editions for more information concerning job possibilities.

MR. CHARLES TINKHAM

One of the younger faculty faces around PUCC nowadays is that of Mr. Tinkham. A Hammondite by birth, he attended a prep school during his teen years. Chicago University provided four years of hard work and the receipt of an unusual degree, that of Ph. B. This little-known degree denotes a bachelor of philosophy and was given in this case for four years of studies without a single elective. Wishing to further his education through post-grad studies, Mr. Tinkham left Chicago U. ("they were a bunch of Aristotelians") and went to the University of Wisconsin to get his B.S. in English ("believe it or not!") and is now working on his Master's. When asked why he was teaching, he said, "I like people and I'm brash enough to think I have something to give them."

As for hobbies or favorite extra-curricular activities, he listed writing, painting, classical music and writing poetry, some of which has been published. He likes to watch basketball games and "to fish a fast stream with worms" because he likes "to feel the tug of the water on the line and occasionally the tug of a fish."

The reporter must now interject a line to say that Mr. Tinkham displayed considerable restraint and good taste when asked about pet peeves by not using the influential circulation of this paper to agitate for larger teacher's pensions and social security for poets with writer's cramp.

His first choice for a vacation would be a three-week session in a writer's camp attended for enlightment and advancement gained through discussion and observation.

When asked for a closing statement, Mr. Tinkham said, "Although considerable freedom is allowed in class themes, all slanderous comments about PUCC will immediately merit an F."

This reporter has only one further thing to say. Teaching must be a rewarding profession because in spite of the salary problem it still attracts a lot of fine people.

Purdue Defeats Self Locking Co.

Led by Ken Rollins and Chuck Lannin the fighting boilermakers trounced Self Locking Co. of the Chicago Industrial League 76-58.

Rollins and Lannin hit 22 and 14 points respectively, giving PUCC a one-two scoring punch around a well balanced scoring attack, and each member of the squad broke into the scoring column.

Name	B	FT	FM	PF	TP
Lannin	5	4	2	0	14
Rector	2	4	0	4	8
Rollins	8	6	4	2	22
Jonas	4	0	1	2	8
Stryzinski	5	2	2	2	12
Jones	1	0	3	3	2
Miller	1	0	0	1	2
Harden	1	0	1	0	2
Jenkins	2	0	2	0	4
Hough	1	0	0	0	2

Joliet Game

At the end of the game the score board read Purdue 70, Joliet J.C. 18. The only trouble was that the score board couldn't register 118.

The fast breaking, sharp shooting Joliet five couldn't be stopped in one of the finest shooting exhibitions the PUCC team had ever encountered this season.

Five of the Joliet men scored in dobule figures with James and Vigliocco hitting 24 and 27 respectively and taking the game scoring honors.

Although PUCC wasn't quite that spectacular, its scoring attack was well balanced with Chuck Lannin, John Rollins, Jack Jones, Clyde Rector, and Bob Stryzinski connecting for 16, 12, 9, 8, and 7 respectively.

PUCC played an even game the first half, being behind by a score of 48-37. But oh that second half!

Boilermakers Lose Sixth

Coach Bob Hayes' Boilermakers lost their sixth game out of eight at the hands of the mighty Ball State freshman quintet, 85-54.

Lacking the necessary height, speed and shooting of the fine Ball State club, the Boilermakers did put on a fine show of ball handling and coolness in the face of an avalanche.

Bob Stryzinski led the Purdue team in total points by tallying 13, and Chuck Lannin was right behind with 10. Perry hit 20 for the winners.

Here are the other scores:

Name	B	FT	FM	PF	TP
Lannin	3	4	0	0	10
Hoffman	0	0	0	2	0
Miller	0	1	1	1	1

Tournament

A second place trophy, enriched *with thrills and heartbreakes, was* placed in *Coach Bob Hayes* office at the armory after the LaFayette Purdue Extensions tournament last February 2.

The first round of play saw Ft. Wayne then pared off with PUCC in the afternoon championship game with PUCC on the short end of a 65-64 final score.

Led by a well balanced scoring attack, the Hayes haymakers stayed ahead of a good rebounding Michigan City team with Bob Stryzinski, Hosea Givan, Clyde Rector, Chuck Jonas and Chuck Lannin hitting 14, 12, 10, 9, and 8 respectively.

The main differences between winning and losing this contest was PUCC's rebounding strength exhibited by Hosea Givan and Clyde Rector.

These two boys played their best games of the season during the tournament and were a main factor in PUCC gaining their second place trophy.

Both boys had 16 apiece in the final game, but PUCC couldn't get that extra basket in the final seconds of the ball game to overcome a 65-64 deficit.

With sixteen seconds to go, PUCC blew a 3 on 1 situation and couldn't get a shot away when they got control of the ball with six seconds to go, thereby losing the championship.

Ft. Wayne Ross, who scored 21 points against PUCC, was named the most valuable player in the tournament.

Here are the PUCC statistics:

Michigan City Game

Name	B	FT	FM	PF	TP
Lannin	4	0	1	1	8
Rector	4	2	2	1	10
Miller	0	2	0	1	2
Givan	5	2	0	2	12
Hoffman	0	0	0	0	0
Harden	0	0	0	0	0
Stryzinski	7	0	1	2	14
Jenkins	0	0	0	1	0
Jonas	1	7	1	0	9
McDonald	0	0	1	0	0

Ft. Wayne Game

Name	B	FT	FM	PF	TP
Lannin	7	2	3	4	16
Rector	7	2	2	4	16
Miller	1	0	0	0	2
Givan	6	0	1	3	12
Stryzinski	2	2	0	0	6
Jonas	5	2	1	3	12

From the Locker Room

By Ralph Armstrong

Joliet J.C. 118; P.U.C.C. 70? That's right! But it isn't because P.U.C.C. is that bad; it's just that Joliet J.C. is that good. Joliet has beaten Wright J.C.; they lost to the Great Lakes team 112-100; and lost to 5th ranked Bradley by five points. Coach Hayes believes in slaying good competition. Whew!

Coach Hayes lost two good players at the end of last semester, but gained three good ones in return. Ken Ashely dropped out of school because of financial difficulties and co-captain Chuck Jonas quit after the LaFayette tournament.

In return the P.U.C.C. roster was reinforced by 6'1" Jack Jones; 5' 10" Jerry Jonas and; 6'2" John Rollins of Portage High School.

The present starting lineup includes 6'1" Bob Stryzinski and the 5'10" Jerry Jones as guards, 6'1" Clyde Rector and 5'11" Chuck Lannin at forward, and 6'2" John Rollins at center, with top reserve strength made up of 5'10" Mike Hough and 6'1" Jack Jones.

It looks like the Eagles is the team to beat in Intramural basketball.

By the way, if any one reading this article knows of a company who would be willing to buy baseball uniforms for P.U.C.C. contact Coach Hayes.

PUCC Bows To Thornton

With four men scoring in double figures, the Purdue Boilermakers were on the short end of a 76-72 score Friday, Jan. 25, at the hands of Thornton J.C.

Although PUCC played an outstanding game during the first part of the ball game, they seemed ot fall apart in the closing minutes as they missed three lay-ups in a row, thus losing by four counters instead of possibly winning by two.

Chuck Jonas led the Hayes' Haymakers with 22 tallies, with Bob Stryzinski, Chuck Lannin and Clyde Rector scoring 14, 14, and 11, respectively.

Mugg scored 27 for the winners.

Name	B	FT	FM	PF	TP
Lannin	6	2	2	5	14
Rector	2	7	2	5	11
Givan	2	0	2	4	4
Jonas	7	8	1	3	22
Stryzinski	6	2	1	3	14
Ashley	2	2	2	5	6
Harden	1	0	3	0	2
Jenkins	0	0	0	2	0
Hough	0	0	0	1	0
